

Paso Robles Area Groundwater Authority

Fiscal Year 2026-2027 Technical Support Services – Addendum 1

September 1, 2026

- Q.** Can PRAGA provide guidance regarding the assumed level of effort or budget that pursuers should use for Task 6, As Needed Technical Support, so that proposals are developed and evaluated using a consistent basis?
- A.** Proposers should identify the relevant labor categories and rates from the required rate sheet for this task and are not required to develop a total price or labor hours for this task.
- Q.** For Task 5, should consultants assume that projects proposed for grant funding will primarily be existing or previously conceptualized GSP projects, or should the scope and fee include development of new project concepts?
- A.** Task 5 should assume projects have already been identified. However, selected consultant may be requested to assist in the final selection of projects through Task 6, as needed tech support.
